

# Louvre Pyramid

Make your own mini-Louvre pyramid!

Cut out the template along the solid orange lines. Flip your template so that the blank side faces you. One at a time, fold each triangle onto the center square along the dotted line. Score the fold with your finger. When all triangles have been folded, bring them to meet in the center at their tips. Tape two triangles together where they join along the side. Then tape the third along one side and then the fourth along both sides. Voila! You have a mini-Louvre pyramid!
